Project Management Certificate

Dallas College - North Lake Campus **Dallas, TX**
Associates of Applied Science - Business Administration

WORK EXPERIENCE

DoorDash/DashMart **Irving, TX**
Operations Associate

- Pick and pack orders accurately and in a timely fashion that come through the app and deliver them to the drivers.
- Receive new inventory and stock it. Review BOL's for invoice accuracy and to determine if there's a need for vendor credits. Stock new inventory and keep track of item shelf life and pull expired items if need be.
- Maintain high attention to detail for inventory accuracy and for receiving invoice accuracy. Also a desire to be self-started in keeping efficient order packing time & efficiency rate.

Smart City Apartment Locating **Dallas, TX**
Apartment Locator

- Create hyper-personalized lists of apartment options to fit my clients needs and available units.
- Communicate with clients and keep them informed, educated and taken care of in the apartment finding process. Schedule tours for them, do virtual tours for out of town clients. Reach out to properties for more details on their behalf.
- Capitalize on CRM to manage 50+ clients at any given time. In my time I was able to assist 75 individuals find a new home. Totalling over \$80k in gross revenue.

PROJECTS

Weather Dashboard *HTML / CSS / Javascript / Bootstrap*
● Using the openweathermap API, I fetched specific location weather information to display for the user. It also includes local storage to be able to view your most recent searches.

Team Profile Generator *HTML / CSS / Javascript / Node / NPM / Bootstrap*
● The generator is launched by the node.js terminal that updates team members and their information. It also focuses on object oriented programming.

Titan Tickets *HTML / CSS / Javascript / Materialize*
● Using the ticketmaster API the user can search any city and get information about concerts. From venue to price range it is all there. It also can send you directly to the ticketmaster floor map to buy your tickets. Added feature is being able to save your favorites and get personalized similar artists from the Herokaupp API.

QR Code Generator *HTML / CSS / Javascript*
● The QR Server API in function with the code allows the user to input a valid URL link and then create a 1 of 1 QR code. This is also mobile responsive which is a great feature for when on the road.
